

Dear Hiring Manager,

I am thrilled to apply for the **Senior Data Scientist, Marketing Inference** role. As a data scientist with **over 6 years** of experience driving growth marketing initiatives, I have a proven track record of delivering measurable business impact through predictive modeling, attribution, and campaign optimization. I am excited by your mission to redefine essential goods purchasing through cutting-edge AI, and I am confident my experience can accelerate your growth objectives.

In my previous roles at **Google**, **Mind24-7**, **Healthcare Inc** and **Annalect US**, I have led initiatives that directly translate into revenue and efficiency gains:

Marketing Mix & Attribution Modeling: Developed and deployed multi-channel marketing mix models, identifying the most impactful channels and touchpoints. Optimized budget allocation, resulting in 36% uplift in marketing ROI across campaigns.

Customer Lifetime Value & Churn Prediction: Built predictive LTV and churn models for multiple service lines (crisis, express, progressive), accurately forecasting revenue impact and informing targeted retention strategies. These models **reduced churn by 12%** in key segments and improved repeat engagement.

Campaign Optimization & Performance Analytics: Analyzed click-through rates, impressions, CPA, CPC, and conversion data to refine digital marketing campaigns, increasing **high-value user acquisition by 18%** while lowering overall acquisition costs.

High-Value Actions & Causal Inference: Identified critical customer behaviors that drive revenue, applying causal inference techniques to inform personalization and growth strategies.

A/B Testing & Experimentation: Designed and executed experiments across campaigns, yielding insights that enhanced **customer targeting and campaign effectiveness by 17%**.

I bring deep technical expertise in Python, SQL, machine learning (XGBoost, Random Forests, ARIMA, LightMM, Markovchain Attribution modeling, Facebook RobynMM), and BI platforms like Tableau and Looker, coupled with the ability to translate complex analyses into clear, actionable recommendations for marketing, product, and executive teams.

Your focus on data driven, AI-powered growth resonates strongly with me. I am eager to bring my expertise in marketing analytics, predictive modeling, and ROI optimization to help the organization maximize marketing efficiency, drive customer engagement, and accelerate revenue growth.

Sincerely,
Mohammed Jawhar
